Your RV is your home on the roadâ??and reliable power is the key to making every trip stress-free. With Heartlandâ??s PowerUp Solar Packages, you can keep the lights on, the fridge running, and your essentials chargedâ??without depending on a campground hookup or noisy generator. Whether youâ??re starting out with solar prep, adding a panel for off-grid convenience, or upgrading to a full system with an inverter for appliances and outlets, youâ??ll enjoy the freedom to travel farther, stay longer, and camp more comfortably anywhere your adventures take you.

What is Solar Power?

The freedom made possible by solar power is only as good as your panel and battery system, and we offer the best. We have created the perfect package for each level of desire for your next boondocking escape. Your solar panels collect energy from the sun, which is then stored in your batteries. We recommend lithium batteries for their quality and extended lifespan. Our packages stand against competitors with safety features like DC to DC power chargers, solar controllers and much more. These are standards that you wonâ??t find anywhere else. In addition to our safety feature, you can pair your setup with a generator, and this is just the start of our superior solar package capabilities.

Power Your Adventure. Anywhere the Road Takes You.

PowerUp Solar Prep

Be ready for solar power when you are. This package includes pre-wiring and prep, making it simple to add solar panels later. Ideal for RVers who want flexibility to upgrade when the time is right.

PowerUp Solar 1

Start your journey into off-grid freedom. Includes (1) 200W roof-mounted solar panel and a 30-amp digital controller, giving you renewable energy to keep essentials like lights and the refrigerator running without plugging in.

PowerUp Solar 2

Take your adventures further with more power and capability. Includes a 30-amp solar controller, (2) 200W roof-mounted solar panels, and a powerful 1,800W inverter—providing energy not just for basics but also for select outlets and appliances. Perfect for longer off-grid stays.
