

# THE HEARTLAND GOLD STANDARD

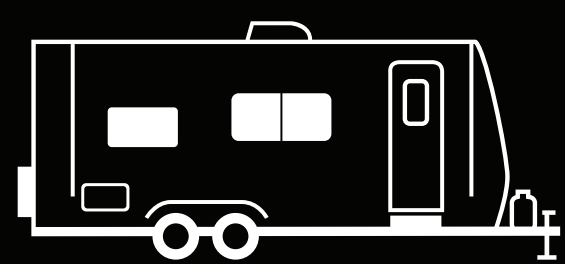

## WHAT WE DO DIFFERENTLY

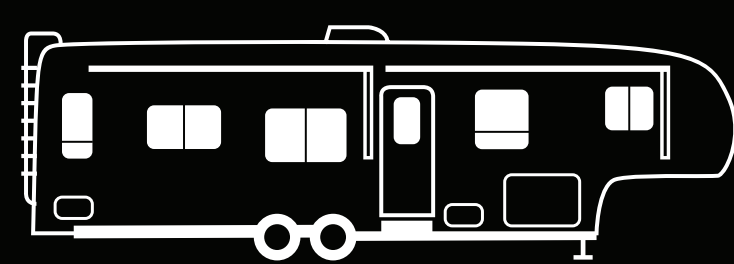

### CoreShield Construction

## WHY IT SHOULD MATTER TO YOU

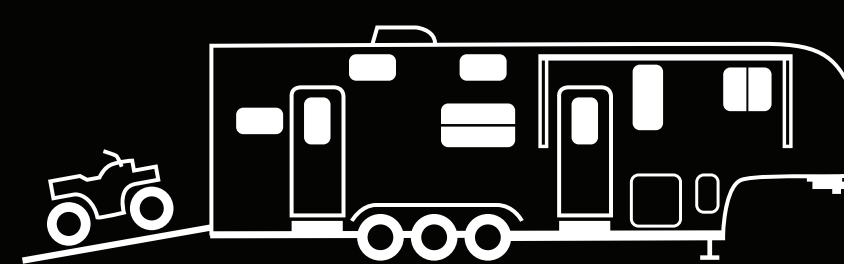

CoreShield construction is about more than walls and floors—it's about peace of mind. With 2-inch vacuum-bonded laminated sidewalls, high-density foam insulation, and reinforcement even in slide end walls and the rear wall. The insulation stays firmly in place to prevent sagging, keeping your RV efficient, cozy, and protected year after year. Built stronger and smarter, CoreShield means less worry about upkeep and more focus on making memories on the road.
